Key To DataSource	Sets "key name to datasource" for a particular part of datasource as Animated Photo Gallery datasource.

VERTICAL

PARAMETER	DESCRIPTION
Vertical Group	Group of vertical android default properties.
Reference Type	These are the android default properties to set selected view with respect of other view.
Reference Value	Reference object that is used for positioning selected object.
Offset Type	marginTop : Specifies extra space on the top side of this view. This space is outside this view's bounds. marginBottom : Specifies extra space on the bottom side of this view. This space is outside this view's bounds.
Offset Value	Value defines the extra space value in pixel.
Center Vertical	This property centers the child vertically with respect to the bounds of its Animated Photo Gallery.
Apply Vertical Custom Properties	If any of the vertical layout setting parameter(s) are selected then this value is selected to indicate user applied vertical custom layout setting parameter(s).

HORIZONTAL

PARAMETER	DESCRIPTION
Horizontal Group	Group of horizontal android default properties.
Reference Type	Reference type is the the default property to set selected view with respect to other view.
Reference Value	Reference object that is used for positioning selected object.
Offset Type	marginLeft : Specifies extra space on the left side of this view. This space is outside this view's bounds. marginRight : Specifies extra space on the right side of this view. This space is outside this view's bounds.
Offset Value	Offset Value defines the extra space value in the pixel.
Center Horizontal	This property centers the child horizontally with respect to the bounds of its parent view.
Apply Horizontal Custom Properties	If any of the horizontal layout setting parameter(s) are selected then this value is selected to indicate user applied horizontal custom layout setting parameter(s).

LAYOUT SETTING

PARAMETER	DESCRIPTION
Top	For instance, a Top value of 2 will push the view's content by 2 pixels to the bottom of the top edge.
Bottom	For instance, a Bottom value of 2 will push the view's content by 2 pixels to the top of the bottom edge.
Center In Parent	This property centers the child vertically with respect to the bounds of its parent view.
Apply Custom Properties	If any of the layout setting parameter(s) are selected then this value is selected to indicate user applied custom layout setting parameter(s).
Default Min Height	The height of the view cannot be less than the given value. If user select "Default Min Height" then android default value is taken otherwise it takes 0dp.
Default Min Width	The width of the view cannot be less than the given value. If user select "Default Min Width" then android default value is taken otherwise it takes 0dp.
Right	For instance, a Right value of 2 will push the view's content by 2 pixels to the left of the right edge.
Left	The padding is expressed in pixels for the left, top, right and bottom parts of the view. Padding can be used to offset the content of the view by a specific amount of pixels. For instance, a Left value of 2 will push the view's content by 2 pixels to the right of the left edge.
Horizontal	Group of horizontal android default properties.
Layout Width	Sets the width of the view match_parent/fill_parent : Takes the width as its parent view wrap_content : Takes the width as its content's width
Layout Height	Sets the height of the view match_parent/fill_parent : Takes the height as its parent view wrap_content : Takes the height as its content's height

DISPLAY/ADVANCETEXT

PARAMETER	DESCRIPTION
Hide	Hiding an element can be done by checking 'Hide'. This property lets you hide the control. Advance - Sets auto resizing with respect to superview, for Animated Photo Gallery.

ADVANCED

PARAMETER	DESCRIPTION
Clips Subviews	A Boolean value that determines whether subviews are confined to the bounds of the control.

Actions

Load

This event is triggered on load of a control. So any actions you want to perform when a control loads like WSCall to load data to be shown on control can be configured in "LOAD" event listed under "Action(S)" tab of the control.

Table Select Row

This event triggered when a row on Table View or Cell on Grid View is tapped. Any actions you want to perform when Cell or Row is tapped can be configured in "Table Select Row" event listed in "ACTION(S)" tab of "Table View", "Grid View", "Expandable Table View" or "Animated Photo Gallery Detail" controls.

Response parameters for this event would be data associated with tapped cell or row.

Animation Completed

This event will be triggered on completion of animation, which was initiated using either "Add Animation" or "Remove Animation" action, so any actions you want perform on animation completion can be configured in "Animation Completed" event listed in "ACTION(S)" tab of control on which you configured "Add Animation" or "Remove Animation" action.

Remarks
